

In the form below, begin to outline where you want to edit music, sound cues, and special effects for your podcasts. It is helpful to work with a partner to bounce ideas off of and brainstorm ways to emphasize the messages and tones throughout your story.

What is the message or lesson of your story?

The message of my story is be grateful for the people who raised you because a lot of the things they did and do now even before you were born have shaped you to be the person you are today.

What is the tone? If you have multiple tones throughout the story identify where they are and when they shift.

Most of my podcast is cheery

The tone somewhat changes to a more sad tone when my mom finds out I am allergic to a lot of foods but it quickly goes back to a cheery mood

It goes into a cool vibe when its talking about Japanese cuisine
